Data governance in the public interest

December 3rd, 2020
by Sarah Gagnon-Turcotte
Applied Research Lab Director
Open North

Our vision: For data and tech that empower transparent, accountable and inclusive communities.
Opportunities

Data collaboration can be harness to:

- Improve **planning** and **service delivery**
- Enable collective **problem-solving** and **innovation**
- Inform **decision-making**, even **policy**
- Generate new **“public goods”**
Challenges & Risks

Data collaboration faces numerous challenges and risks:

- Uncertain regulatory environment
- Risk of unethical use of data
- Unclear ownership of data
- Limited public trust
How can data governance help?

Make the most of your data

Minimize risks as much as possible

Data governance determines:
- **who** makes different decisions about the data of an organization or group;
- **how** they make them, and;
- **how** they are held accountable.

**authority + decision-making + accountability**
Data governance in the public interest

● A collaborative data governance
● Delivering concrete benefits for the public
● Compliant with the following key principles
  ○ Responsibility
  ○ Effectiveness
  ○ Accountability
New wave of data collaboration

Data collaboration happens under a variety of stewardship and governance structures:

- Data collaboratives
- Data commons
- Data trusts and fiduciaries
- Data cooperatives
Thank you!
